

MU Map Traveller

SKU 110991035

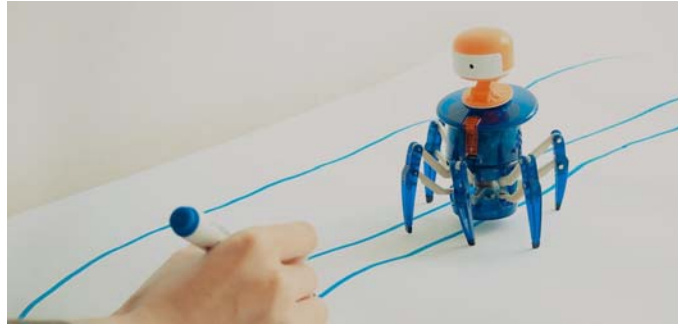

This product contains battery, might apply to shipping restriction.

Description

Simply put MU on Hexbug Spider to create a new autonomous robot MU Map Traveller. You may select different modes with the mode button on the back of MU, and make the Map Traveller follow a person, a line, or a ball. Kids can create their own maps and the Map Traveller can follow the routes the kids design.

You can update the MU through our [firmware updates site](#).

Features

- **Get rid of remote controls**
 - Let MU lead the toys get out of the maze.
- **Road Recognition**
 - MU can follow the line/road that the kids draw.
- **Follow People**
 - When a person is close by, MU can follow the person.
- **Various ways to play**
 - Encourage kids to create their own games by programming.
